INDEX TO VOLUME 51, 2000

AUTHOR AND TITLE INDEX

(Excluding *Book Selection* and *Viewpoints*)
* = Case-Oriented Paper

Achary, K. K.:
(*see* Geetha, K. K.)
Ackermann, F.:
(*see* Eden, C.)
Arantes, A.:
(*see* Themido, I.)
Atkinson, J. B.:
Some related paradoxes of queuing theory: new cases and a unifying explanation, 921
Audsley, E.:
(*see* Darby-Dowman, D.)
Azevedo, A. L. and Sousa, J. P.:
Order planning for networked make-to-order enterprises—a case study, 1116

Baker, R. D.:
How to correctly calculate discounted healthcare costs and benefits, 863
Ballestero, E.:
Project finance: a multi-criteria approach to arbitration, 183
Barbanente, A.:
(*see* Khakee, A.)
Barker, S.:
(*see* Darby-Dowman, D.)
Barton, P. M. and Tobias A. M.:
Discrete quantity approach to continuous simulation modelling, 485
Baynat, B. and Dallery, Y.:
An approximation method for general closed queuing networks with Fork/Join mechanisms, 198
Bell, P. C. and Haehling von Lanzenauer, C.:
Teaching objectives: the value of using cases in teaching operational research, 1366
Bell, P. C.:
Forecasting demand variation when there are stockouts, 358
Ben-Daya, M. and Hariga, M.:
Economic lot scheduling problem with imperfect production processes, 875
Berman, O., Drezner, Z. and Wesolowsky, G. O.:
Routing and location on a network with hazardous threats, 1093
Bodily, S. E.:
(*see* Chelst, K.)
Bodnovich, T. A.:
(*see* Wong, B. K.)
Borri, D.:
(see Khakee, A.)
Bowers, J. A.:
Multiple schedules and measures of resource constrained float, 855
*Bowles, G. and Dagpunar, J. S.:
Optimisation of sinking funds for major repairs in a housing association, 156

Brailsford, S.:
(*see* Davies, R.)
Brimberg, J. and ReVelle, C.:
The maximum return-on-investment plant location problem, 729
*Brint, A. T.:
Sequential inspection sampling to avoid failure critical items being in an at risk condition, 1051
Brooks, M.:
(*see* Smith, K. A.)
*Bryant, J. W. and Chin, C. K.:
Integrating approaches to revitalise a church's mission strategy, 689

Callery, C. A.:
(*see* Snowdon, J. L.)
Cañavate-Bernal, R., Landete-Ruiz, M. and Marín-Pérez, A.:
On the resolution of the single product capacitated machine siting problem, 982
Canning, C.:
(*see* Davies, R.)
Carville, S.:
(*see* Carey, M.)
*Carey, M. and Carville S.:
Testing schedule performance and reliability for train stations, 666
Cassandras, C.:
(*see* Ho, Y-C.)
Cassel, R. A.:
(*see* Pidd, M.)
Chelst, K. and Bodily, S. E.:
Structured risk management: filling a gap in decision analysis education, 1419
Chen, C-H.:
(*see* Ho, Y-C.)
Chen, H-L.:
(*see* Wu, C.)
Chen, R. C. H. and Lamb, J. D.:
Making efficient simulation experiments interactively with a desktop simulation package, 501
Cherikh, M.:
On the effect of centralisation on expected profits in a multi-location newsboy problem, 755
Chien, K-L.:
(*see* Hung, Y-F.)
Chin, C. K.:
(*see* Bryant, J. W.)
Chinneck, J. W. and Ramadan, K.:
Linear programming with interval coefficients, 209
Christer, A.:
(*see* Wang, W.)

Christiansen, M.:
(*see* Fagerholt, K.)
Christodoulou, K. and Vlahos, K.:
Variable structure modelling of dynamic industry systems, 1029
Chung, Q. B., Willemain, T. R. and O'Keefe, R. M.:
Influence of model management systems on decision making: empirical evidence and implications, 936
Clarke, S. and Lehaney, B.:
Mixing methodologies for information systems development and strategy: a higher education case study, 542
Clarke, S. R.:
(*see* Dyte, D.)
Clímaco, J. N.:
(see Dias, L. C.)
Cochran, J. J.:
Introductory business OR cases: successful use of cases in introductory undergraduate business college operational research courses, 1377
Coolen, F. P. A. and Coolen-Schrijner, P.:
Condition monitoring: a new perspective, 311
Coolen-Schrijner, P.:
(*see* Coolen, F. P. A.)
Crabbe, D.:
(*see* Davies, R.)
Cuninghame-Greene R.:
Commentary on Lee A (1970): Supranational Operational Research, 775

Daellenbach, H. and Petty, N. W.:
Using MENTOR to teach systems thinking and OR methodology to first-year students in New Zealand, 1358
Dagpunar, J. S.:
(*see* Bowles, G.)
Dagpunar, J. S.:
A continuous time solution for optimal claim limits in vehicle insurance, 123
Dai, L.:
(*see* Ho, Y-C.)
Dallery, Y.:
(*see* Baynat, B.)
Dangerfield, B. C. and Roberts, C. A.:
A strategic evaluation of capacity retirements in the steel industry, 53
*Darby-Dowman, K., Barker, S., Audsley, E. and Parsons, D.:
A two-stage stochastic programming with recourse model for determining robust planting plans in horticulture, 83
Das, S. R.:
Adaptive protocols for parallel discrete event simulation, 385
Davies, R., Brailsford, S., Roderick, P., Canning, C. and Crabbe, D.:
Using simulation modelling for evaluating screening services for diabetic retinopathy, 476
de Boer, L., van Dijkhuizen, G. and Telgen, J.:
A basis for modelling the costs of supplier selection: the economic tender quantity, 1128
de Kok, Ton.:
(*see* Janssen, F.)
de la Fuente, D.:
(*see* Gómez, A.)
De Silva, F. N. and Eglese, R. W.:
Integrating simulation modelling and GIS: spatial decision support systems for evacuation planning, 423
Dekker, R.:
(*see* Korporaal, R.)
Dekker, R.:
(*see* Melchiors, P.)
Deler, B.:
(*see* Dinçer, C.)
Dempster, M. A. H., Hicks Pedrón, N., Medova, E. A., Scott, J. E. and Sembos, A.:
Planning logistics operations in the oil industry, 1271
Dias, L. C. and Clímaco, J. N.:
Additive aggregation with variable interdependent parameters: the VIP analysis software, 1070
Dickson, K: (*see* Williams, T.)
Dinçer, C. and Deler, B.:
On the distribution of throughput of transfer lines, 1170
*Dowsland, K. A. and Thompson, J. M.:
Solving a nurse scheduling problem with knapsacks, networks and tabu search, 825
Drezner, Z.:
(*see* Berman, O.)
Drezner, Z.:
(*see* Gurnani, H.)
Drinkwater, P.:
(*see* Naudé, P.)
Dyner, I.:
Energy modelling platforms for policy and strategy support, 136
Dyson, R. G.:
(*see* Sarrico, C. S.)
Dyson, R. G.:
OR and strategy: Editorial introduction, 4
Dyson, R. G.:
Strategy, performance and operational research, 5
Dyte, D. and Clarke, S. R.:
A ratings based Poisson model for World Cup soccer simulation, 993

Eden, C. and Ackermann, F.:
Mapping distinctive competencies: a systemic approach, 12
Eden, C., Williams, T., Ackermann, F. and Howick, S.:
The role of feedback dynamics in disruption and delay on the nature of disruption and delay (D&D) in major projects, 291
Edwards, J. S.:
(*see* Read, M. J.)
Edwards, J. S.:
(*see* Simpson, G.)
Eglese, R. W.:
(*see* de Silva, F. N.)
Eldabi, T., Paul, R. J. and Taylor S. J. E.:
Simulating economic factors in adjuvant breast cancer treatment, 465
El-Taji, S.:
(*see* Snowdon, J. L.)

*Fagerholt, K. and Christiansen, M.:
A combined ship scheduling and allocation problem, 834
*Fagerholt, K., Heimdal, S. I. and Loktu, A.:
Shortest path in the presence of obstacles: an application to ocean shipping, 683
Fan, Z.:
(*see* Wei, Q.)
Fernandes, C.:
(*see* Themido, I.)
Ferreira, P. A. V.:
(*see* Oliveira, S. L. C.)
Fildes, R.:
A Commentary on 'Blackett: Operational Research', 3
Finlay, P. N. and Wilson, J. M.:
A survey of contingency factors affecting the validation of end-user spreadsheet-based decision support systems, 949

Finlay, P. N.:
(*see* French, A.)
Foster, M. J.:
Evaluating foreign direct investments: new challenges for strategic planners, 45
French, A. and Finlay, P. N.:
Strongarm arcade games: a case study in mathematical modelling, 1385

Gallivan, S.:
(*see* Utley, M.)
Gan, B-P. and Turner, S. J.:
An asynchronous protocol for virtual factory simulation on shared memory multiprocessor systems, 413
Gardner, D. T.:
Efficient formulation of electric utility resource planning models, 231
Gear, A. E.:
(*see* Read, M. J.)
Geetha, K. K. and Achary, K. K.:
Are more suppliers better?: generalising the Guo and Ganeshan procedure, 1179
Gómez, A. and de la Fuente, D.:
Resolution of strip-packing problems with genetic algorithms, 1289
*Greasley, A.:
A simulation analysis of arrest costs, 162
*Gregory, W. J. and Midgley, G.:
Planning for disaster: developing a multi-agency counselling service, 278
Grinyer, P. H.:
A cognitive approach to group strategic decision taking: a discussion of evolved practice in the light of received research results, 21
Guedes, A. P.:
(*see* Themido, I.)
Gunasekaren, A. Macbeth, D. K. and Lamming, R.:
Modelling and analysis of supply chain management systems: an editorial overview, 1112
Gupta, J. N. D. , Ho. J. C. and Webster, S.:
Bicriteria optimisation of the makespan and mean flowtime on two identical parallel machines, 1330
Gurnani, H. and Drezner, Z.:
Deterministic hierarchical substitution inventory models, 129
Gutierrez, M.:
(*see* Ríos, M.)

Haehling von Lanzenauer, C.:
(*see* Bell, P. C.)
Haley, K. B.:
Commentary on Ackoff RL (1979): The future of OR is past; Resurrecting the future of OR, 1009
Hao, G., Wei, Q. L., and Yan, H.:
A game theoretical model of DEA efficiency, 1319
Haouari, M. and Ladhari, T.:
Minimising maximum lateness in a two-machine flowshop, 1100
Harding, J. A. and Popplewell, K.:
Simulation: an application of factory design process methodology, 440
Hariga, M.:
(*see* Ben-Daya, M.)
Hariga, M. A.:
Setup cost reduction in (Q, r) policy with lot size, setup time and lead-time interactions, 1340
Harris, J. II., Ozgen, H. and Ozcan, Y.:
Do mergers enhance the performance of hospital efficiency?, 801
Hartmann, S.:
Packing problems and project scheduling models: an integrating perspective, 1083
Haughton, M. A.:
Quantifying the benefits of route reoptimisation under stochastic customer demands, 320
Heimdal, S. I.:
(*see* Fagerholt, K.)
Heuts, R. M. J.:
(*see* Strijbosch, L. W. G.)
Hicks Pedrón, N.:
(*see* Dempster, M. A. H.)
Ho, J. C.:
(*see* Gupta, J. N. D.)
Ho, M. P. P.:
(*see* Chu, S. C. K.)
Ho, Y-C., Cassandras, C. G., Chen, C-H. and Dai, L.:
Ordinal optimisation and simulation, 490
Holt, T.:
The future for Official Statistics, 1010
Horowitz, I.:
An option-pricing look at the introduction of private labels, 221
Hough, J.:
Commentary on Belton (1985): The use of a simple multi-criteria model to assist in selection from a shortlist, 895
Hough, J.:
Commentary on Rosenhead JV (1978): An education in robustness, 1217
Howick, S.:
(*see* Eden, C.)
Hung, Y-F. and Chien, K-L.:
A multi-class multi-level capacitated lot sizing model, 1309
Hurrion, R. D.:
A sequential method for the development of visual interactive meta-simulation models using neural networks, 712

Islei, G.:
(*see* Naudé, P.)

James, J. C. and Salhi, S.:
The location of protection devices on electrical tree networks: a heuristic approach, 959
Jan, C.-G.:
(*see* Jan, T.-S.)
Jan, C-G.:
(see Jan, T-S)
Jan, T.-S. and Jan, C.-G.:
Designing simulation software to facilitate learning of quantitative system dynamics skills: a case in Taiwan, 1408
Jan, T-S. and Jan C-G.:
Development of weapon systems in developing countries: a case study of long range strategies in Taiwan, 1041
Janssen, F.:
de Kok, Ton, and van der D Schouten, F.:
Approximate analysis of the delivery splitting model, 1136
Johnston, F. R.:
Commentary on Burgin and Wild (1967): Stock control—experience and usable theory, 1111

*Kao, C. and Liu S-Tai.:
Data envelopment analysis with missing data: an application to University libraries in Taiwan, 897
Karabati, S.:

SUBJECT INDEX

(This index includes all *papers*)

Accelerated life models 1185
1-maximin 371

Activity based costing 162, 1148
Additive value function 1070
Agent-based simulation 1029
Agriculture 83
Air transport 258, 449, 457
Allocation 744, 755, 834
Analytic hierarchy process 237, 341
Analytical review 1060
Approximate algorithm 1228
Approximate model 209
Arena 449
Artificial intelligence 776, 1248
Artificial neural networks 1060
Asynchronous production lines 1296
Auditing 1060
Autocorrelated demand 762

Bargain models 183
Bayesian 1051
BCG matrix 789
Benchmarking 789
Bicriteria 1330
Bidding 291
Bootstrap 712
Branch and bound 1100
Budget 602
Building 156
Business education 1377

Capacity assignment 574
Capacity expansion planning 231
Capacity planning 1228
Cascade-correlation 913
Case method 1377
Case study 532, 542, 1366
Cellular manufacturing 609
Civil industry 1020
Claims 291
Classification 532
Clinical trials 465
Clustering 532, 1205
Coal mining 1020
Cognitive approach 21
Cognitive mapping 12, 689
Combinatorial analysis 90
Combinatorial optimisation 1289
Combining forecasts 72
Command and control 431
Communication 1432
Community OR 278, 510, 689
Competencies 12
Compromise programming 183, 736
Compromise weight 625
Computers 385, 405
Condition monitoring 145, 311, 1218
Conflict analysis 431
Consensus 557
Consistent matrix 237
Container stowage 1248
Contingency approach 949
Convex analysis 333
Convex cone 1319
Convexity 129
Cost benefit 449
Cost discounting 863
Cost overrun 301
Cost-effectiveness 812
Critical realism 1256
Critical systems 542
Critical systems thinking 278
Customer purchasing 583
Cutting stock problem 253, 1083, 1238
Cyclic scheduling 1296

Data envelopment analysis 102, 789, 801, 843, 897, 906, 1319
Data mining 532
Data modelling 1193
Decision analysis 221, 272, 720, 1419
Decision making behaviour 936
Decision modelling 145
Decision support 395
Decision support systems 168, 258, 449, 936, 949, 1070
Deconstruction 700
Defence studies 431
Demand management 1136
Design 1398
Design of experiments 501
Deterministic 129
Development projects 301
Disaster response 278
Discrete-event dynamic systems 490
Discrete-event simulation 490
Disjoint paths 574
Dispatching 263
Distributed enterprises 1116
Distribution 364, 755
Distribution free approach 602, 744
Distribution management 564
Downs Syndrome 272
Dual resource constrained job shops 592
Dynamic programming 123

Economic lot scheduling problem 875
Economic tender quantity 1128
Education 542, 843, 906, 913, 1351, 1385, 1419
Efficiency 843
Efficiency measurement 102
Electric power industry 231
Electrical trees 959
Electricity 1051
Electricity demand forecasting 72
Emergency planning 423

Empirical results 1330
Energy 736, 1271
Energy modelling 136
Enterprise design 440
Entropy 237
Environmental studies 736
Epidemics 656
Epistemology 1256
Evacuation 423
Evaluation 45
Evaluation quality 700
Evolutionary approach 1408
Evolutionary modelling 1029
Experiential learning 1439
Expert judgement 1218
Expert system 776
Exponential smoothing 358

Facility location 371, 971
Factory design 440
Finance 156
Flowtime minimisation 1330
Forecasting 358, 744, 1184
Foreign direct investment 45
Fork/Join mechanisms 198
Functionalism 542
Fuzzy programming 341
Fuzzy sets 897

Game theory 333, 720, 1319
Gamma process 1218
Genetic algorithms 1289, 1309
Geographical information systems 423
Goal programming 1193
Graph matching 253
Group decision making 168, 625
Group strategic decision taking 21
Group support systems 557

Health 272, 812, 825
Health service 278, 476, 518
Health-care application 1193
Hepatitis C 656
Heuristics 90, 253, 263, 364, 564, 609, 959, 971, 982, 1116, 1205, 1289
Higher education 789
History of OR 1020
Hospitals 518, 801

Imperfect processes 875
Imprecise information 1070
Infectious diseases 812
Information content 237
Information models 440
Information systems 542
Innovative education 1377
Insensitivity 921
Insurance 123, 532
Integer programming 61, 258, 364, 609, 825, 982
Integer-friendliness 729
Interactive methods 333
Intermittent demand 1184
Internationalisation 45
Interpretivism 542
Interpurchase time 583
Interval coefficients 209
Inventory control 111, 129, 364, 602, 635, 744, 755, 1136, 1179, 1184, 1340
Investment 729
Iron and steel 1020

Japan 510
Java 405
Judgemental modelling 168

Key economic factors 465

Lagrangean relaxation 574, 982
Lateness 1100
Lead time 1179, 1340
Learning 583, 592, 1408, 1432
Legal 291
Lexicographic 720
Libraries 897
Linear programming 83, 156, 209
Location 720, 959, 982, 1093
Logistics 364, 683, 1271
Logistics costing 1148
Long-range strategy 1041
Loss systems 921
Lost sales 111
Lot sizing 875, 1309, 1340
Low stochastic structure 311

Machine interference models 921
Maintenance 145, 156, 869, 1051, 1218
Makespan minimisation 1330
Management 510
